

The image shows a tall, white metal tower structure, likely a wind turbine or power line tower, against a cloudy sky. A person is visible at the top of the tower. In the foreground, there is a large, grey metal component, possibly part of a crane or hoist, with various bolts and a circular opening. The overall scene is industrial and technical.

CWC
ENERGY SERVICES
2019 **Q2 Report**

MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

Management's Discussion and Analysis ("MD&A") is a review of the results of operations and liquidity and capital resources of CWC Energy Services Corp. (unless the context indicates otherwise, a reference in this MD&A to "CWC", the "Company", "we", "us", or "our" means CWC Energy Services Corp.). The following discussion and analysis provided by CWC is dated July 31, 2019 and should be read in conjunction with unaudited condensed interim consolidated financial statements ("Financial Statements") for the six months ended June 30, 2019, the audited annual consolidated financial statements for the year ended December 31, 2018 ("Annual Financial Statements"), and the annual management's discussion and analysis for the year ended December 31, 2018 ("Annual MD&A"). Additional information regarding CWC can be found in the Company's latest Annual Information Form ("AIF"). The condensed interim consolidated financial statements are prepared in accordance with IFRS and IAS 34, Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of financial statements. All amounts are expressed in Canadian dollars unless otherwise noted. Additional information relating to CWC, is available on SEDAR at www.sedar.com.

⁽²⁾ Not meaningful.

Working capital (excluding debt) for June 30, 2019 has decreased \$8.3 million (43%) since December 31, 2018 driven by a \$0.3 million (66%) decrease in cash, \$7.9 million (33%) decrease in accounts receivable, a \$0.1 million (3%) decrease in prepaid expenses and deposits, and a \$0.03 million (0%) decrease in accounts payable. Due to the seasonality of the oilfield service business in Canada, working capital is typically lowest in Q2 and builds throughout the next three quarters. Long-term debt (including current portion) has decreased \$8.3 million (18%) from December 31, 2018 driven by the collection of accounts receivable combined with seasonally lower activity in Q2 2019 compared to Q4 2018. Shareholders' equity has decreased since December 31, 2018 due to the net loss for the six months ended June 30, 2019 and the purchase and cancellation of common shares under the NCIB program, partially offset by issuance of common shares under the Company's restricted share plans.

Highlights for the Three Months Ended June 30, 2019

- Average Q2 2019 crude oil pricing, as measured by WTI, of US\$59.89/bbl was 9% higher than the Q1 2019 average price of US\$54.87/bbl (Q2 2018: \$67.97/bbl). The price differential in Q2 2019 between Canadian heavy crude oil, as represented by WCS, and WTI maintained a differential in the range of US\$10.00/bbl to US\$15.00/bbl as the Government of Alberta mandated crude oil production curtailment was reduced from 250,000 bbls/day at the start of Q2 2019 to 175,000 bbls/day by the end of Q2 2019. Natural gas prices, as measured by AECO, decreased 57% from an average of \$1.84/GJ in Q1 2019 to \$0.79/GJ in Q2 2019 (Q2 2018 \$1.14/GJ), which is very low in historical terms.
- CWC moved two Contract Drilling rigs into the United States in Q2 2019 with operations beginning in mid-June 2019. U.S. Contract Drilling revenue of \$1.7 million and 25 drilling rig operating days for Q2 2019 was achieved. Q2 2019 average revenue per operating day of US \$54,188 was largely due to customer recovery of mobilization costs to relocate equipment from Canada to the Eagle Ford basin in Texas and the DJ basin in Wyoming.
- CWC's Canadian drilling rig utilization in Q2 2019 of 11% (Q2 2018: 16%) was below the Canadian Association of Oilwell Drilling Contractors ("CAODC") industry average of 18%, as CWC's customers reduced or delayed their drilling programs in the quarter. Activity levels decreased 46% to 72 drilling rig operating days in Q2 2019 (Q2 2018: 133 drilling rig operating days) as the Company prepared to move two drilling rigs to its U.S. operations. CWC's U.S. drilling rig utilization in Q2 2019 was 69% (Q2 2018: n/a) as CWC started its U.S. drilling operations in mid-June 2019. CWC's service rig utilization in Q2 2019 of 28% (Q2 2018: 30%) was driven by 23,129 operating hours being 20% lower than the 28,831 operating hours in Q2 2018. The significant drop in Q2 2019 activity level for both the drilling rigs and our production-oriented service rigs was a direct result of a prolonged spring breakup and wet weather conditions combined with a lower crude oil price during the quarter, compared to a year ago. In addition, the Government of Alberta mandated production curtailment continued to temporarily slow down the need for newly drilled wells and workover and maintenance work on producing wells. These lower activity levels resulted in lower revenue in Q2 2019 compared to Q2 2018, while Adjusted EBITDA⁽¹⁾ and net loss stayed constant as a result of management's unrelenting focus on reducing costs, as noted below.
- Revenue of \$18.7 million, a decrease of \$3.5 million (16%) compared to \$22.2 million in Q2 2018.
- Adjusted EBITDA⁽¹⁾ of \$0.1 million, an increase of \$0.07 million compared to \$0.03 million in Q2 2018. CWC has achieved 24 consecutive quarters of positive Adjusted EBITDA since Q2 2013.
- Net loss of \$0.6 million, a decrease of \$2.5 million compared to net loss of \$3.1 million in Q2 2018.
- During Q2 2019, 623,000 (Q2 2018: 1,023,000) common shares were purchased under the Normal Course Issuer Bid ("NCIB") and 744,000 common shares (Q2 2018: 935,500) were cancelled and returned to treasury.

⁽¹⁾ Please refer to the "Reconciliation of Non-IFRS Measures" section for further information.

Highlights for the Six Months Ended June 30, 2019

- CWC's Canadian drilling rig utilization in the first six months of 2019 of 31% (2018: 39%) exceeded the CAODC industry average of 27%. CWC's U.S. drilling rig utilization in the first six months of 2019 was 69% (Q2 2018: n/a) as CWC started its U.S. drilling operations in mid-June 2019. CWC's service rig utilization in the first six months of 2019 was 28% compared to 43% in the same period in 2018. Activity levels in both the drilling rig and service rig divisions dropped in 2019 as a result of CWC's exploration and production ("E&P") customers reducing or delaying their drilling and well maintenance

programs as a result of lower crude oil prices and the Government of Alberta mandated production curtailment temporarily slowing down the need for newly drilled wells and workover and maintenance work on producing wells.

- Revenue of \$50.0 million, a decrease of \$21.2 million (30%) compared to \$71.2 million in the first six months of 2018.
- Adjusted EBITDA⁽¹⁾ of \$4.8 million, a decrease of \$2.7 million (36%) compared to \$7.5 million in the first six months of 2018.
- Net loss of \$0.6 million, a decrease of \$1.2 million (67%) compared to \$1.9 million in the first six months of 2018.
- For the six months ended June 30, 2019, the Company purchased 2,673,500 (2018: 2,417,500) common shares under its NCIB and 2,536,000 (2018: 2,254,000) common shares were cancelled and returned to treasury.

(1) Please refer to the “Reconciliation of Non-IFRS Measures” section for further information

Corporate Overview

CWC Energy Services Corp. is a premier contract drilling and well servicing company operating in Canada and the United States with a complementary suite of oilfield services including drilling rigs, service rigs, swabbing rigs and coil tubing units. The Company's corporate office is located in Calgary, Alberta, with a U.S. office in Houston, Texas and operational locations in Nisku, Grande Prairie, Slave Lake, Sylvan Lake, Drayton Valley, Lloydminster, Provost and Brooks, Alberta. The Company's shares trade on the TSX Venture Exchange under the symbol “CWC”.

Operational Overview

Contract Drilling

CWC Ironhand Drilling, the Company's Contract Drilling segment, has a fleet of nine telescopic double drilling rigs with depth ratings from 3,200 to 5,000 metres. Eight of nine rigs have top drives and three have pad rig walking systems. All of the drilling rigs are well suited for the most active depths for horizontal drilling in the Western Canadian Sedimentary Basin (“WCSB”), including the Montney, Cardium, Duvernay and other deep basin horizons. The Company has expanded its drilling rig services into select United States basins including the Permian, Eagle Ford, Denver-Julesburg (“DJ”) and Bakken. One of the Company's strategic initiatives is to continue to increase the capabilities of its existing fleet to meet the growing demands of E&P customers for deeper depths at a cost effective price while providing a sufficient internal rate of return for CWC's shareholders.

⁽¹⁾ Revenue per operating day is calculated based on operating days (i.e. spud to rig release basis). New or inactive drilling rigs are added based on the first day of field service. Revenue is enhanced by one-time recovery of mobilization costs

⁽²⁾ Drilling rig utilization is calculated based on operating days (i.e. spud to rig release basis).

Canadian Contract Drilling revenue of \$1.6 million for Q2 2019 (Q2 2018: \$2.8 million) was achieved with a utilization rate of 11% (Q2 2018: 16%), compared to the CAODC industry average of 18%, as CWC's customers reduced or delayed their drilling programs in the quarter. CWC completed 72 drilling rig operating days in Q2 2019, a 46% decrease from 133 drilling rig operating days in Q2 2018, as the Company prepared to move two drilling rigs to its U.S. operations. The Q2 2019 average revenue per operating day of \$22,750 was an increase of 7% from \$21,227 in Q2 2018. The significant reduction in Q2 2019 activity level was a direct result of a prolonged spring breakup and wet weather conditions combined with a lower crude oil price during the quarter, compared to a year ago. In addition, the Government of Alberta mandated production curtailment continued to temporarily slow down the need for newly drilled wells.

CWC moved two Contract Drilling rigs into the United States in Q2 2019 with operations beginning in mid-June 2019. U.S. Contract Drilling revenue of \$1.7 million and 25 drilling rig operating days for Q2 2019 was achieved. Q2 2019 average revenue per operating day of US \$54,188 was largely due to customer recovery of mobilization costs to relocate equipment from Canada to the Eagle Ford basin in Texas and the DJ basin in Wyoming. CWC intends to move two more drilling rigs into the United States by the end of 2019, subject to obtaining contracts with U.S. customers.

Production Services

With a fleet of 148 service rigs, CWC is the largest well servicing company in Canada as measured by operating hours. CWC's service rig fleet consists of 77 single, 57 double, and 14 slant rigs providing services which include completions, maintenance, workovers and abandonments with depth ratings from 1,500 to 5,000 metres. CWC has chosen to park 56 of its service rigs and focus its sales and operational efforts on the remaining 92 active service rigs due to the reduction in the number of service rigs required to service the WCSB, in part as a result of the Government of Alberta's mandated crude oil production curtailments.

CWC's fleet of nine coil tubing units consist of six Class I and three Class II coil tubing units having depth ratings from 1,500 to 3,200 metres. The Company continues to focus its sales and operational efforts on servicing steam-assisted gravity drainage ("SAGD") wells that are shallower in depth and more appropriate for coil tubing operations.

CWC's fleet of 13 swabbing rigs operate under the trade name CWC Swabtech. The swabbing rigs are used to remove liquids from the wellbore and allow reservoir pressures to push the commodity up the tubing casing. The Company has chosen to park five of its swabbing rigs and focus its sales and operational efforts on the remaining eight active swabbing rigs.

⁽¹⁾ Service and swabbing rig utilization is calculated based on 10 hours a day, 365 days a year. New service and swabbing rigs are added based on the first day of field service. Service and swabbing rigs requiring their 24,000 hour recertification, refurbishment or have been otherwise removed from service for greater than 90 days are excluded from the utilization calculation until their first day back in field service.

⁽²⁾ Coil tubing unit utilization is calculated based on 10 hours a day, 365 days a year. New coil tubing units are added based on the first day of field service. Coil tubing units that have been removed from service for greater than 90 days are excluded from the utilization calculation until their first day back in field service.

Production Services revenue was \$15.4 million in Q2 2019, down \$4.0 million (21%) compared to \$19.4 million in Q2 2018. The significant drop in Q2 2019 activity level for our production-oriented service rigs was a direct result of a prolonged spring breakup and wet weather conditions combined with a lower crude oil price during the quarter, compared to a year ago. CWC estimates that 4,224 service rig operating hours (Q2 2018: 1,856 operating hours) of lost activity were due to wet weather conditions in Q2 2019 out of a total 83,840 operating hours. In addition, the Government of Alberta mandated production curtailment continued to temporarily slow down the need for workover and maintenance work on producing wells.

CWC's service rig utilization in Q2 2019 of 28% (Q2 2018: 30%) was driven by 23,129 operating hours being 20% lower than the 28,831 operating hours in Q2 2018. However, the Q2 2019 average revenue per hour of \$646 increased \$4 per hour (1%) over the \$642 in Q2 2018. Furthermore, Q2 2019 average revenue per hour excluding the top volume customers of \$687 was \$10 per hour (1%) higher than Q2 2018 average revenue per hour of \$677 suggesting the loss in CWC's service rig operating hours in Q2 2019 were primarily from CWC's top volume customers who were the most affected by the Government of Alberta's mandated production curtailment.

CWC's coil tubing utilization in Q2 2019 of 4% (Q2 2018: 17%) with 301 operating hours was 75% lower than the 1,212 operating hours in Q2 2018. Average revenue per hour for coil tubing services of \$830 in Q2 2019 is 9% higher than \$762 in Q2 2018. The lower utilization reflects the continuing challenge of low natural gas prices and lower crude oil prices during the quarter, compared to a year ago, as well as the Government of Alberta mandated production curtailments temporarily slowing down the need for work on SAGD wells.

CWC swabbing rig utilization in Q2 2019 of 9% (Q2 2018: 13%) with 661 operating hours was 31% lower than the 958 operating hours in Q2 2018. Average revenue per hour for swabbing rigs of \$262 in Q2 2019 is 1% lower than \$265 in Q2 2018 reflecting the continuing challenge of low natural gas prices.

Outlook

Crude oil, as represented by WTI, averaged US\$59.89/bbl in Q2 2019, an increase of 9% compared to Q1 2019 average price of US\$54.87/bbl (Q2 2018: US\$67.97/bbl) and finished the quarter on June 30, 2019 at US\$58.20/bbl. Natural gas prices, as measured by AECO, decreased 57% from an average of \$1.84/GJ in Q1 2019 to \$0.79/GJ in Q2 2019 (Q2 2018 \$1.14/GJ), which remains very low in historical terms. The price differential in Q2 2019 between Canadian heavy crude oil, as represented by WCS, and WTI maintained a differential in the range of US\$10.00/bbl to US\$15.00/bbl as the Government of Alberta mandated crude oil production curtailment was reduced from 250,000 bbls/day at the start of Q2 2019 to 175,000 bbls/day by the end of Q2 2019. A further approved 25,000 bbls/day reduction in each of August 2019 and September 2019 will reduce the total production curtailment to 125,000 bbls/day. In addition, recent negotiations between certain senior E&P companies and the Government of Alberta to reduce the remaining production curtailment by allowing E&P companies to increase their crude oil production if such incremental capacity is transported by railcars, appears to have both industry and government support. The existing and future reductions in the production curtailment has and will continue to allow CWC's E&P customers to increase their production capacity, which in turn has and will continue to gradually increase CWC's activity levels for both its Contract Drilling and Production Services segment.

CWC has sustainably positioned itself by providing its E&P customers with the highest quality service from the highest quality people at reasonable prices. However, the Canadian federal government's passing of Bill C-69 and Bill C-48 has negatively affected the availability of investment capital and growth for Canada's oil and gas industry. Bill C-69 imposes more requirements for consulting affected Indigenous communities, widens public participation in the review process and requires climate change to be considered when major national resource-exploitation and transportation projects are being evaluated. It applies to a wide range of projects including interprovincial pipelines, highways, mines and power links. Bill C-48 imposes a moratorium on oil tankers north of Vancouver Island. Despite these challenges, there appears to be renewed optimism in Canada's energy industry with Albertans electing a new government on April 16, 2019 whose leader intends to fight for Canada's energy sector, and with the recent approval by the National Energy Board of the expansion of the Trans Mountain Pipeline on June 18, 2019. Combining these recent events with the positive final investment decisions made in Q4 2018 by proponents of a liquefied natural gas processing facility (LNG Canada) and the building of its corresponding pipeline (Coastal GasLink) in northeast British Columbia, there is renewed optimism that investment capital and growth may return to the Canadian Energy sector.

While Canadian oilfield service activity currently remains muted, the United States energy industry continues to experience exponential growth. Over the past year, CWC has been actively identifying opportunities to establish a U.S. presence and is pleased to report that in March 2019 the Company signed its first U.S. contract to deliver contract drilling services to a multinational E&P company in the Eagle Ford basin in Texas. A second U.S. contract was signed in April 2019 to move a second drilling rig for another E&P customer to the DJ basin in Wyoming. Both drilling rigs began operations in the U.S. in mid-June 2019. It is the Company's intent to move an additional two drilling rigs to the U.S. in the second half of 2019 subject to signing customer contracts such that CWC positions up to four of its nine drilling rig fleet (44%) in the U.S. CWC believes these moves will help the Company achieve higher utilization, revenue and Adjusted EBITDA for its Contract Drilling segment over a longer-term period.

While CWC remains focused on its operational and financial performance, it also recognizes the need to pursue opportunities that create long-term shareholder value. With the support of the Board of Directors, management continues to actively pursue business combinations in North America and globally in the drilling and well servicing industry. CWC cautions that there are no guarantees that strategic opportunities will result in a transaction, or if a transaction is undertaken, as to its terms or timing.

⁽¹⁾ Please refer to the "Reconciliation of Non-IFRS Measures" section for further information.

Q2 2019 revenue of \$18.7 million, a decrease of \$3.5 million (16%) compared to \$22.2 million in Q2 2018. Revenue increased \$0.6 million (20%) in the Contract Drilling segment and decreased \$4.1 million (21%) in the Production Services segment in Q2 2019 compared to Q2 2018. The increase in revenue for Contract Drilling is a result of our expansion into the U.S. while the decrease in revenue for Production Services is a result of a prolonged spring breakup and wet weather conditions combined with a lower crude oil price during the quarter, compared to a year ago. In addition, the Government of Alberta mandated production curtailment continued to temporarily slow down the need for newly drilled wells and workover and maintenance work on producing wells.

For the six months ended June 30, 2019, revenue of \$50.0 million, a decrease of \$21.2 million (30%) compared to \$71.2 million in the first six months of 2018. The decrease in revenue for both Contract Drilling and Production Services is a result of a lower crude oil price during the first six months of 2019, compared to a year ago, a prolonged spring breakup and wet weather conditions and the Government of Alberta mandated production curtailment temporarily slowing down the need for newly drilled wells and workover and maintenance work on producing wells.

Revenue contribution from the Company's top ten customers increased to 63% for the first six months of 2019 from 54% for the same period in 2018 with CWC's top customer's revenue contribution decreasing to 11% in the first six months of 2019 from 21% for the same period in 2018.

For the six months ended June 30, 2019, approximately 84% of revenue (six months ended June 30, 2018: 82%) was from work on crude oil wells while 16% (Q2 2018: 18%) was from natural gas wells. Further, in the six months ended June 30, 2019 approximately 38% of revenue (six months ended June 30, 2018: 28%) was related to drilling and completions work, 50% (six months ended June 30, 2018: 60%) from maintenance and workovers on producing wells and 12% (six months ended June 30, 2018: 12%) from abandonments.

Many direct operating expenses, including labour costs related to field operating employees, are variable in nature and increase or decrease with activity levels such that changes in operating costs generally correspond to changes in revenue or activity levels. Contract Drilling's gross margin percentage of 14% in Q2 2019 is higher than the 5% in Q2 2018 primarily as a result of reduced activity and increased amounts of scheduled repairs and maintenance conducted in Q2 2018. For the first six months of 2019, Contract Drilling's 22% gross margin is lower than the 26% in Q2 2018 primarily as a result of startup costs to prepare and move two drilling rigs to the U.S. Production Services' gross margin of 22% in Q2 2019 is consistent with 22% in Q2 2018. For the six months of 2019 Production Services' gross margin of 27% is higher than 23% in Q2 2018 primarily as a result of a drop in CWC's top volume customers' activity levels, which were most affected by the Government of Alberta's mandated production curtailment, and corresponding decrease in volume discount and revenue.

Selling and Administrative Expenses

\$ thousands	Three months ended June 30,				Six months ended June 30,			
	2019	2018	Change \$	Change %	2019	2018	Change \$	Change %
Selling and administrative expenses	3,708	4,310	(602)	(14%)	7,936	9,411	(1,475)	(16%)

Selling and administrative expenses were \$3.7 million in Q2 2019, a decrease of \$0.6 million (14%) compared to \$4.3 million in Q2 2018.

Selling and administrative expenses were \$8.0 million for the six months ended June 30, 2019, a decrease of \$1.5 million (16%) compared to \$9.4 million in the same period in 2018.

Selling and administrative expenses are predominately fixed in nature, but have declined in both the quarter and six months ended June 30, 2019 due to proactive focus on reducing costs and ensuring staffing levels are optimized for the organization based on economic conditions. Severance costs totaling \$0.2 million were paid in the first six months of 2019 (2018: \$0.1 million).

Adjusted EBITDA

\$ thousands	Three months ended June 30,				Six months ended June 30,			
	2019	2018	Change \$	Change %	2019	2018	Change \$	Change %
Adjusted EBITDA ⁽¹⁾								
Contract drilling	90	(180)	270	n/m ⁽²⁾	2,089	3,085	(996)	(32%)
Production services	951	1,549	(598)	(39%)	5,059	7,540	(2,481)	(33%)
Corporate	(926)	(1,338)	412	31%	(2,341)	(3,116)	775	25%
	115	31	84	n/m ⁽²⁾	4,807	7,509	(2,702)	(36%)
Adjusted EBITDA margin (%) ⁽¹⁾	1%	0%	n/a	0%	10%	11%	n/a	(1%)

⁽¹⁾ Please refer to the "Reconciliation of Non-IFRS Measures" section for further information.

⁽²⁾ Not meaningful.

Management uses Adjusted EBITDA as a measure of the cash flow generated by the Company. Positive Adjusted EBITDA provides the cash flow needed to grow the business through purchase of equipment or business acquisitions, fund working capital, service and reduce outstanding long-term debt, pay a dividend or repurchase outstanding common shares under the NCIB.

Adjusted EBITDA was \$0.11 million for Q2 2019, an increase of \$0.08 million compared to \$0.03 million in Q2 2018.

For the six months ended June 30, 2019, Adjusted EBITDA was \$4.8 million, a decrease of \$2.7 million (36%) compared to \$7.5 million for the same period in 2018. The decrease in Adjusted EBITDA is a result of reduced activity level for both Contract Drilling and Production Services due to a lower crude oil price during the first six months of 2019, compared to a year ago, a prolonged spring breakup and wet weather conditions and the Government of Alberta mandated production curtailment temporarily slowing down the need for newly drilled wells and workover and maintenance work on producing wells.

Stock Based Compensation

\$ thousands	Three months ended June 30,				Six months ended June 30,			
	2019	2018	Change \$	Change %	2019	2018	Change \$	Change %
Stock based compensation	197	237	(40)	(17%)	426	522	(96)	(18%)

Stock based compensation is primarily a function of outstanding stock options and restricted share units ("RSUs") being expensed over their vesting periods.

Stock based compensation was \$0.2 million in Q2 2019, a decrease of \$0.04 million (17%) compared to \$0.2 million in Q2 2018.

For the six months ended June 30, 2019 stock based compensation was \$0.4 million, a decrease of \$0.1 million (18%) compared to \$0.5 million for the same period in 2018.

Finance Costs

\$ thousands	Three months ended June 30,				Six months ended June 30,			
	2019	2018	Change \$	Change %	2019	2018	Change \$	Change %
Finance costs	658	593	65	11%	1,390	1,283	107	8%

Finance costs were \$0.7 million in Q2 2019, an increase of \$0.1 million (11%) compared to \$0.6 million in Q2 2018.

For the six months ended June 30, 2019 finance costs were \$1.4 million, an increase of \$0.1 million compared to \$1.3 million for the same period in 2018.

For both Q2 2019 and the six months ended June 30, 2019, finance costs increased slightly due to an increase in interest rates despite lower long-term debt levels in 2019 compared to 2018.

Depreciation and Amortization

\$ thousands	Three months ended June 30,				Six months ended June 30,			
	2019	2018	Change \$	Change %	2019	2018	Change \$	Change %
Depreciation and amortization								
Contract drilling	924	633	291	46%	2,347	2,376	(29)	(1%)
Production services	1,818	2,048	(230)	(11%)	3,870	5,093	(1,223)	(24%)
Corporate	260	224	36	16%	518	449	69	15%
	3,002	2,905	97	3%	6,735	7,918	(1,183)	(15%)

Effective April 1, 2019 the Company changed the method for depreciating its drilling and well servicing rigs from unit of production to straight line and changed certain estimates relating to useful lives and salvage values. The change in depreciation methodology reflects the current and future economic environment within the industry and the Company believes that straight line depreciation better reflects the pattern in which the assets' future economic benefits will be consumed by the Company, primarily as a result of idle or underutilized assets being depreciated more quickly in periods of low activity. These adjustments were applied prospectively and caused an increase in depreciation for Q2 2019 of \$697. Coil tubing units, capitalized recertification's and other production equipment have been and will continue to be depreciated on a straight line basis. Amortization of Intangibles is based on estimated remaining life.

The increase in Contract Drilling depreciation for Q2 2019 compared to Q2 2018 is a result of the straight-line depreciation compared with lower activity levels seen in Q2 2018.

(Gain) Loss on Disposal of Equipment

\$ thousands	Three months ended June 30,				Six months ended June 30,			
	2019	2018	Change \$	Change %	2019	2018	Change \$	Change %
(Gain) Loss on disposal of equipment	(55)	407	(462)	n/m ⁽¹⁾	(78)	153	(231)	n/m ⁽¹⁾

⁽¹⁾ Not meaningful.

Management continually monitors the asset mix and equipment needs and invests and divests assets as needed to optimize operations. During Q2 2019 the gain on disposal of equipment was primarily the result of the sale of ancillary equipment and one vehicle.

Deferred Income Taxes Expense (Recovery)

\$ thousands	Three months ended June 30,		Six months ended June 30,	
	2019	2018	2019	2018
Net loss before income taxes	(3,687)	(4,111)	(3,666)	(2,367)
Deferred income tax recovery	(3,122)	(1,044)	(3,054)	(496)
Deferred income tax recovery as a % of net loss before income taxes	n/m ⁽¹⁾	25%	n/m ⁽¹⁾	21%
Expected statutory income tax rate	26.5%	27%	26.5%	27%

⁽¹⁾ Not meaningful.

Income taxes are a function of taxable income and are calculated differently than accounting net income. Differences between accounting net income and taxable income include such things as gains or losses on disposal of fixed assets, stock based compensation, differences between income tax estimates and actual tax filings, goodwill impairment, and other differences.

The deferred income tax recovery in Q2 2019 and the first six months of 2019 of \$3.1 million (Q2 2018: \$1.0 million) and \$3.0 million (2018: \$0.5 million) respectively, is a result of the May 28, 2019 Government of Alberta substantively enacted reduction in the provincial corporate tax rates from 12% to 8% by the year 2022.

The Company has substantial tax pools and non-capital losses available to reduce future taxable income such that the Company does not expect to pay any cash taxes for the next several years.

Net Loss

\$ thousands	Three months ended June 30,				Six months ended June 30,			
	2019	2018	Change \$	Change %	2019	2018	Change \$	Change %
Net loss and comprehensive loss	(565)	(3,067)	2,502	82%	(612)	(1,871)	1,259	67%

Net loss and comprehensive loss was \$0.6 million in Q2 2019, a decrease of \$2.5 million (82%) compared to \$3.1 million in Q2 2018.

For the first six months ended June 30, 2019 net loss of \$0.6 million, a decrease of \$1.2 million (67%) compared to \$1.9 million for the same period in 2018.

The decrease in net loss is a result of the May 28, 2019 Government of Alberta substantively enacted reduction in the provincial corporate tax rates from 12% to 8% by the year 2022 and a prolonged spring breakup and wet weather conditions and the Government of Alberta mandated production curtailment temporarily slowing down the need for newly drilled wells and workover and maintenance work on producing wells.

Liquidity and Capital Resources

Source of Funds:

The Company's liquidity needs in the short and long-term can be sourced in several ways including: funds from operations, borrowing against existing credit facilities, new debt instruments, equity issuances and proceeds from the sale of assets. Cash inflows are used to repay outstanding amounts on the Company's credit facilities, acquire shares under the NCIB and fund capital requirements.

During the first six months of 2019, the Company's funds from operations of \$4.7 million combined with a \$8.0 million decrease in non-cash working capital and \$0.3 million proceeds on disposal of equipment were used to fund a \$8.9 million reduction in long term debt, \$2.6 million of capital expenditures, \$1.7 million of interest on long-term debt and finance lease payments and \$0.5 million in acquisitions of shares under the NCIB.

At June 30, 2019 the Company had working capital (excluding debt) of \$10.7 million compared to \$19.0 million at December 31, 2018. (Please refer to the "Reconciliation of Non-IFRS Measures" section for further information). The decrease in working capital (excluding debt) from December 31, 2018 is due to lower accounts receivable from lower revenue in Q2 2019 versus Q4

2018 partially offset by a small decrease in accounts payable. Typically, as activity levels increase or decrease working capital will also increase or decrease.

The Company's \$75 million credit facilities ("Bank Loan") provides financial security and flexibility to July 31, 2020 and a quarterly financial covenant for Consolidated Debt to Consolidated EBITDA ratio of 4.00 to 1. The Bank Loan is secured by a general security agreement and a first charge security interest covering all of the assets of the Company. Under the terms of the Bank Loan, the Company is required to comply with certain financial covenants. The Company is in compliance with each of the financial covenants at June 30, 2019. The Company expects to be able to renew the Bank Loan prior to maturity. As of June 30, 2019, the applicable rates under the Bank Loan are: bank prime rate plus 1.00%, banker's acceptances rate plus a stamping fee of 2.00%, and standby fee rate of 0.45%. In April 2019 the Company amended the Bank Loan to allow the movement of equipment into the United States.

The Company also has a five year credit facility (the "Mortgage Loan") originally in the principal amount of \$12.8 million. The Mortgage Loan is secured by, among other things, a collateral mortgage from the Company in favour of the bank over properties located in Sylvan Lake, Brooks and Slave Lake Alberta. These borrowing arrangements significantly reduce the Company's overall borrowing costs by reducing standby charges on the syndicated Bank Loan and realizing a lower interest rate on the term Bank Loan. The Mortgage Loan has been amortized over 22 years with blended monthly principal and interest payments. The Company entered into an interest rate swap to exchange the floating rate interest payments for fixed rate interest payments, which fix the Bankers Acceptance-Canadian Dollar Offered Rate components of its interest payment on the outstanding term debt. Under the interest rate swap agreement, the Company pays a fixed rate of 2.65% per annum plus the applicable credit spread of 1.35%, for an effective fixed rate of 4.0%. The fair value of the interest rate swap arrangement is the difference between the forward interest rates and the discounted contract rate. As of June 30, 2019 the mark-to-market value of the interest rate swap resulted in a net loss of \$0.4 million.

Capital Requirements

On January 16, 2019 the Company announced its capital expenditure budget for 2019 of \$5.4 million all of which is maintenance and infrastructure capital related to recertifications, additions and upgrades to field equipment for the drilling rigs, service rigs and coil tubing divisions as well as information technology infrastructure. The decrease of \$6.4 million to the 2019 capital budget compared to the 2018 capital expenditure of \$11.8 million is a result of the Company taking a more cautious view of the 2019 economic and operating environment than in the prior year. CWC intends to finance its 2019 capital expenditure budget from operating cash flows.

As utilization of the Company's equipment increases, CWC plans to recertify several of its service rigs. As of June 30, 2019, the Company has capital spending plans as noted in the section titled "Capital Expenditures". Additional discretionary capital expenditures will be required in order to continue to grow the Company's assets and revenue in the future. It is anticipated future cash requirements for capital expenditures will be met through a combination of funds from operations and borrowing against existing credit facilities as required. However, additional funds may be raised by new debt instruments, equity issuances and proceeds from the sale of assets.

CWC may require additional financing in the future to implement its strategies and business objectives. It is possible that such financing will not be available, or if available, will not be available on favorable terms. If CWC issues any shares in the future to finance its operations or implement its strategies, the current shareholders of CWC may incur a dilution of their interest.

Common Shares and Dividends

The following table summarizes outstanding share data and potentially dilutive securities:

	July 31, 2019	June 30, 2019	December 31, 2018
Common shares	510,350,291	510,350,291	512,509,291
Stock options	22,089,000	22,228,333	24,351,333
Restricted share units	5,551,001	5,551,001	5,910,001

During the six months ended June 30, 2019, no stock options were exercised or granted, 1,700,000 stock options expired and 423,000 stock options were forfeited. In addition, 377,000 RSU's were exercised, 36,000 RSU's were forfeited and 54,000 were granted.

On April 15, 2019, the Company replaced its expired NCIB with a new NCIB which now expires on April 14, 2020. Under the new NCIB the Company may purchase, from time to time as it considers advisable, up to 25,535,115 of issued and outstanding common shares through the facilities of the TSXV or other recognized marketplaces. In addition, CWC entered into an automatic

securities purchase plan (the "ASPP") (as defined under applicable securities laws) with Raymond James Ltd. ("Raymond James") for the purpose of making purchases under the ASPP. Such purchases will be determined by Raymond James in its sole discretion, without consultation with CWC having regard to the price limitation and aggregate purchase limitation and other terms of the ASPP and the rules of the TSXV. Conducting the NCIB as an ASPP allows common shares to be purchased at times when CWC would otherwise be prohibited from doing so pursuant to securities laws and its internal trading policies.

During the six months ended June 30, 2019, 2,673,500 common shares were purchased under the NCIB and 2,536,000 common shares were cancelled and returned to treasury.

Capital Expenditures

\$ thousands	Three months ended June 30,				Six months ended June 30,			
	2019	2018	Change \$	Change %	2019	2018	Change \$	Change %
Contract drilling	1,164	4,986	(3,822)	(77%)	1,258	5,116	(3,858)	(75%)
Production services	692	1,123	(431)	(38%)	1,877	1,930	(53)	(3%)
Corporate	46	-	46	n/m ⁽¹⁾	61	28	33	118%
Total capital expenditures	1,902	6,109	(4,207)	(69%)	3,196	7,074	(3,878)	(55%)
Growth capital	-	4,278	(4,278)	(100%)	-	4,278	(4,278)	(100%)
Maintenance and infrastructure capital	1,902	1,831	71	4%	3,196	2,796	400	14%
Total capital expenditures	1,902	6,109	(4,207)	(69%)	3,196	7,074	(3,878)	(55%)

⁽¹⁾ Not meaningful.

Capital expenditures of \$1.9 million in Q2 2019, a decrease of \$4.2 million (69%) compared to \$6.1 million in Q2 2018.

Capital expenditures of \$3.2 million for the six months ended June 30, 2019, a decrease of \$3.9 million (55%) compared to \$7.1 million in the same period in 2018.

The 2019 capital expenditure budget of \$5.4 million was approved by the Board of Directors on January 16, 2019 and comprises entirely of maintenance and infrastructure capital related to recertifications, additions and upgrades to field equipment for the drilling rigs, service rigs and coil tubing divisions as well as information technology infrastructure.

Commitments and Contractual Obligations

Under the terms of the Company's amended Bank Loan, the borrowing under the Bank Loan are due in full on July 31, 2020. The Company is committed to monthly payments of interest and bank charges until July 31, 2020. The Company's Mortgage Loan is being amortized over 22 years with blended monthly principal and interest payments and matures on June 28, 2023. There have been no significant changes in other commitments or contractual obligations since December 31, 2018. Management believes that there will be sufficient cash flows generated from operations to service the interest on the debt and finance the required maintenance capital of the Company in 2019.

Summary and Analysis of Quarterly Data

\$ thousands, except per share amounts	2019		2018				2017	
	Jun. 30	Mar. 31	Dec. 31	Sep. 30	Jun. 30	Mar. 31	Dec. 31	Sep. 30

Total long-term debt	36,618	43,296	44,896	46,394	36,803	51,377	49,810	34,404
Shareholders' equity	183,526	184,041	184,231	185,195	184,834	187,829	186,519	151,833

The table above summarizes CWC's quarterly results for the previous eight financial quarters. CWC's operations are carried out in western Canada and the United States. The second quarter is typically expected to be the weakest financial and operating quarter for the Company due to ground conditions being impacted by spring breakup. The ability to move heavy equipment in the Canadian crude oil and natural gas fields is dependent on weather conditions. As warm weather returns in the spring, the winter's frost comes out of the ground rendering many secondary roads incapable of supporting the weight of heavy equipment until they have thoroughly dried out. The duration of this spring breakup has a direct impact on the Company's activity levels. In addition, many exploration and production areas in northern Canada are accessible only in winter months when the ground is frozen enough to support equipment. As a result, late March through May is traditionally the Company's slowest time, and as such the revenue, operating costs, and financial results of the Company will vary on a quarterly basis.

Through the eight quarters presented, the amount of revenue and net income (loss), adjusted for the effects of seasonality, have fluctuated primarily due to changes in the utilization of equipment, changes in the day and hours billing rate, and the increase in the number of drilling rigs, service rigs, swabbing rigs and coil tubing units over the period as detailed in the section titled "Operational Overview".

Other significant impacts have been a result of:

- Q2 2019 saw CWC move two drilling rigs from Canada into the United States which commenced operations in mid-June 2019. Wet weather conditions during the quarter significantly impacted activity levels in both the Canadian Contract Drilling and Production Services segments. During Q2 2019, 623,000 common shares were purchased under the NCIB and a total of 744,000 common shares were cancelled and returned to treasury.
- Q1 2019 saw a continuation of reduced activity levels for both the drilling rigs and our production-oriented service rigs as a direct result of lower WTI prices during the quarter and the Government of Alberta mandated 325,000 bbls/day production curtailments taking effect in January 2019. During Q1 2019, 2,050,500 common shares were purchased under the NCIB and a total of 1,792,000 common shares were cancelled and returned to treasury.
- Q4 2018 saw the price differential between Canadian heavy crude oil, as represented by WCS, and WTI widened at times to unprecedented levels of over US\$50/bbl compared to the historical normalized range of US\$10/bbl to US\$15/bbl. These significant WTI-WCS differential resulted in the Government of Alberta announcement on December 2, 2018 mandating a 325,000 bbls/day crude oil production curtailment on Alberta oil companies producing more than 10,000 bbls/day causing E&P customers to shorten or delay their workover and maintenance work on producing wells. During Q4 2018, 7,858,000 common shares were purchased, cancelled and returned to treasury under the NCIB;
- Q3 2018 saw the completion of significant customer driven capital expenditure upgrades on Drilling Rig #4 to meet customer demands for deeper depths at cost effective prices. Wet weather conditions during the quarter significantly impacted activity levels in both the Contract Drilling and Production Services segments resulting in 7% and 4% of lost operating days and hours respectively. During Q3 2018, 1,175,500 common shares were purchased under the NCIB and a total of 1,309,000 common shares were cancelled and returned to treasury;
- Q2 2018 saw significant customer driven capital expenditure upgrades to two drilling rigs to meet customer demands for deeper depths at cost effective prices. During Q2 2018, 1,023,000 common shares were purchased under the NCIB and a total of 935,500 common shares were cancelled and returned to treasury;

- Q1 2018 service rig fleet set a new Company record of 53,979 operating hours as a result of the increase in the number of service rigs from the acquisition of the C&J Canada assets. During Q1 2018, 1,394,000 common shares were purchased under the NCIB and a total of 1,318,500 common shares were cancelled and returned to treasury;
- Q4 2017 saw the acquisition of C&J Canada's service and swabbing rig assets for \$37.5 million. Higher operating activity and pricing in the Contract Drilling and Production Services' segments also contributed to the improved financial results compared to the previous seven quarters. CWC closed a rights offering for aggregate gross proceeds of \$26.0 million (\$25.9 million after deductions of share issue costs) to partially finance the acquisition of the C&J Canada assets. Under the fully subscribed offering, 130,148,781 common shares were issued to shareholders who exercised their rights. During Q4 2017, 405,000 common shares were purchased, cancelled and returned to treasury under the NCIB;
- During Q3 2017, 1,402,000 common shares were purchased under the NCIB and a total of 1,441,500 common shares were cancelled and returned to treasury.

Critical Accounting Estimates and Judgments

This MD&A of the Company's financial condition and results of operations is based on the consolidated financial statements which are prepared in accordance with IFRS. The preparation of the consolidated financial statements in conformity with IFRS requires that certain estimates and judgments be made with respect to the reported amounts of revenue and expenses and the carrying amounts of assets and liabilities. These estimates are based on historical experience and management's judgment. Anticipating future events involves uncertainty and consequently the estimates used by management in the preparation of the consolidated financial statements may change as future events unfold, additional experience is acquired or the Company's operating environment changes. In many cases the use of judgment is required to make estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. Other than the adoption of IFRS 16 and the prospective change for depreciating drilling and well servicing rigs and certain estimates relating to their useful lives and salvage values there have been no significant or material changes in the nature of critical accounting estimates and judgements since December 31, 2018.

The Company has adopted IFRS 16 on January 1, 2019 using the modified retrospective approach. The modified retrospective approach does not require restatement of prior period financial information as it recognizes the cumulative effect as an adjustment to opening retained earnings and applies the standard prospectively. Accordingly, comparative information in the Company's financial statements are not restated.

On adoption, lease liabilities were measured at the present value of the remaining lease payments discounted using the Company's incremental borrowing rate on January 1, 2019. ROU assets were measured at an amount equal to the lease liability. For leases previously classified as operating leases, the Company applied the exemption not to recognize ROU assets and liabilities for leases with a lease term of less than 12 months, excluded initial direct costs from measuring the ROU asset at the date of initial application, and applied a single discount rate to a portfolio of leases with similar characteristics. For leases that were previously classified as finance leases under IAS 17, the carrying amount of the ROU asset and lease liability remain unchanged upon transition and were determined at the carrying amount immediately before the adoption date.

The recognition of the present value of minimum lease payments resulted in an additional \$645 of ROU assets and associated lease liabilities. The Company has recognized lease liabilities in relation to lease arrangements previously disclosed as operating lease commitments under IAS 17 that meet the criteria of a lease under IFRS 16. Upon recognition, the Company's weighted average incremental borrowing rate used in measuring lease liabilities was 6%.

The nature of the Company's leasing actives includes automobiles and office space.

CEO and CFO Certifications

The CEO and CFO of TSX Venture Exchange listed companies, such as CWC, are not required to certify they have designed internal control over financial reporting, or caused it to be designed under their supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. Instead, an optional form of certification has been made available to TSX Venture Exchange listed companies and has been used by CWC's certifying officers for the June 30, 2019 interim filings. The certification reflects what the Company considers to be a more appropriate level of CEO and CFO certification given the size and nature of the Company's operations. This certification requires that the certifying officer's state:

- They have reviewed the interim financial report and MD&A;

- That, based on their knowledge, they have determined there is no untrue statement of a material fact, or any omission of material fact required to be stated which would make any statement not misleading in light of the circumstances under which it was made within the annual filings; and
- That based upon their knowledge, the annual filings, together with the other financial information included in the annual filings, fairly present in all material respects the financial condition, financial performance and cash flows of the Company as of the date and for the periods presented in the interim filings.

Risks and Uncertainties

Certain activities of the Company are affected by factors that are beyond its control or influence. Additional risks and uncertainties that management may be unaware of at the present time may also become important factors which affect the Company. Along with the risks discussed in this MD&A, other business risks faced by the Company may be found under “Risk Factors” in the Company’s most recent Annual Information Form which is available under the Company’s profile at www.sedar.com.

Forward-Looking Information

This MD&A contains certain forward-looking information and statements within the meaning of applicable Canadian securities legislation. Certain statements contained in this MD&A, including most of those contained in the section titled “Outlook” and including statements which may contain such words as “anticipate”, “could”, “continue”, “should”, “seek”, “may”, “intend”, “likely”, “plan”, “estimate”, “believe”, “expect”, “will”, “objective”, “ongoing”, “project” and similar expressions are intended to identify forward-looking information or statements. In particular, this MD&A contains forward-looking statements including management’s assessment of future plans and operations, planned levels of capital expenditures, expectations as to activity levels, expectations on the sustainability of future cash flow and earnings, expectations with respect to crude oil and natural gas prices, activity levels in various areas, expectations regarding the level and type of drilling and production and related drilling and well services activity in the WCSB and the United States, expectations regarding entering into long term drilling contracts and expanding its customer base, and expectations regarding the business, operations, revenue and debt levels of the Company in addition to general economic conditions. Although the Company believes that the expectations and assumptions on which such forward-looking information and statements are based are reasonable, undue reliance should not be placed on the forward-looking information and statements because the Company can give no assurances that they will prove to be correct. Since forward-looking information and statements address future events and conditions, by their very nature they involve inherent risks and uncertainties. Actual results could differ materially from those currently anticipated due to a number of factors and risks. These include, but are not limited to, the risks associated with the drilling and oilfield services sector (ie. demand, pricing and terms for oilfield drilling and services; current and expected oil and gas prices; exploration and development costs and delays; reserves discovery and decline rates; pipeline and transportation capacity; weather, health, safety and environmental risks), integration of acquisitions, competition, and uncertainties resulting from potential delays or changes in plans with respect to acquisitions, development projects or capital expenditures and changes in legislation, including but not limited to tax laws, royalties and environmental regulations, stock market volatility and the inability to access sufficient capital from external and internal sources.. Accordingly, readers should not place undue reliance on the forward-looking statements. Readers are cautioned that the foregoing list of factors is not exhaustive. Additional information on these and other factors that could affect the Company’s financial results are included in reports on file with applicable securities regulatory authorities and may be accessed through SEDAR at www.sedar.com. The forward-looking information and statements contained in this MD&A are made as of the date hereof and the Company undertakes no obligation to update publicly or revise any forward-looking information or statements, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws. Any forward-looking statements made previously may be inaccurate now.

Loss (gain) on sale of equipment	(55)	407	(78)	153
Adjusted EBITDA ⁽¹⁾	115	31	4,807	7,509
Adjusted EBITDA per share – basic and diluted ⁽¹⁾	\$0.00	\$0.00	\$0.01	\$0.01
Adjusted EBITDA margin (Adjusted EBITDA/Revenue) ⁽¹⁾	1%	0%	10%	11%
Weighted average number shares outstanding – basic and diluted	510,978,053	521,289,658	511,823,718	521,682,326
<u>Gross margin:</u>				
Revenue	18,746	22,245	50,004	71,170
Less: Direct operating expenses	14,923	17,904	37,261	54,250
Gross margin ⁽²⁾	3,823	4,341	12,743	16,920
Gross margin percentage ⁽²⁾	20%	20%	25%	24%

\$ thousands	June 30, 2019	December 31, 2018
<u>Working capital (excluding debt):</u>		
Current assets	18,596	26,893
Less: Current liabilities	(9,197)	(8,793)
Add: Current portion of long term debt	1,357	928
Working capital (excluding debt) ⁽³⁾	10,756	19,028
Working capital (excluding debt) ratio ⁽³⁾	2.4:1	3.4:1
<u>Net debt:</u>		
Long term debt	35,261	43,968
Less: Current assets	(18,596)	(26,893)
Add: Current liabilities	9,197	8,793
Net debt ⁽⁴⁾	25,862	25,868

⁽¹⁾ Adjusted EBITDA (Earnings before interest and finance costs, income tax expense, depreciation, amortization, gain or loss on disposal of asset, goodwill impairment, stock based compensation and other one-time gains and losses) is not a recognized measure under IFRS. Management believes that in addition to net income, Adjusted EBITDA is a useful supplemental measure as it provides an indication of the Company's ability to generate cash flow in order to fund working capital, service debt, pay current income taxes, pay dividends, repurchase common shares under the Normal Course Issuer Bid, and fund capital programs. Investors should be cautioned, however, that Adjusted EBITDA should not be construed as an alternative to net income (loss) determined in accordance with IFRS as an indicator of the Company's performance. CWC's method of calculating Adjusted EBITDA may differ from other entities and accordingly, Adjusted EBITDA may not be comparable to measures used by other entities. Adjusted EBITDA margin is calculated as Adjusted EBITDA divided by revenue and provides a measure of the percentage of Adjusted EBITDA per dollar of revenue. Adjusted EBITDA per share is calculated by dividing Adjusted EBITDA by the weighted average number of shares outstanding as used for calculation of earnings per share.

⁽²⁾ Gross margin is calculated from the statement of comprehensive loss as revenue less direct operating costs and is used to assist management and investors in assessing the Company's financial results from operations excluding fixed overhead costs. Gross margin percentage is calculated as gross margin divided by revenue. The Company believes the relationship between revenue and costs expressed by the gross margin percentage is a useful measure when compared over different financial periods as it demonstrates the trending relationship between revenue, costs and margins. Gross margin and gross margin percentage are non-IFRS measures and do not have any standardized meaning prescribed by IFRS and may not be comparable to similar measures provided by other companies.

⁽³⁾ Working capital (excluding debt) is calculated based on current assets less current liabilities excluding the current portion of long-term debt. Working capital (excluding debt) is used to assist management and investors in assessing the Company's liquidity. Working capital (excluding debt) does not have any meaning prescribed under IFRS and may not be comparable to similar measures provided by other companies. Working capital (excluding debt) ratio is calculated as current assets divided by the difference of current liabilities less the current portion of long term debt.

⁽⁴⁾ Net debt is not a recognized measure under IFRS and does not have any standardized meaning prescribed by IFRS and may not be comparable to similar measures provided by other companies. Management believes net debt is a useful indicator of a company's debt position.

CWC ENERGY SERVICES CORP.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the three and six months ended June 30, 2019 and 2018

(Unaudited)

Stated in thousands of Canadian dollars except share and per share amounts

1. Reporting entity

CWC Energy Services Corp. (“CWC” or the “Company”) is incorporated under the Business Corporations Act (Alberta). The address of the Company’s head office is Suite 610, 205 – 5th Avenue SW, Calgary, Alberta, Canada. The Company is an oilfield services company providing drilling and production services to oil and gas exploration and development companies throughout the Western Canadian Sedimentary Basin (“WCSB”) and the Bakken, Denver-Julesburg (“DJ”), Eagle Ford and Permian basins located in the United States. These consolidated financial statements reflect only the Company’s proportionate interests in such activities and are comprised of the Company and its subsidiaries. The Company’s common stock is listed and traded on the TSX Venture Exchange under the symbol CWC. Additional information regarding CWC’s business is available in CWC’s most recent Annual Information Form available on SEDAR at www.sedar.com, on the Company’s website www.cwcenergyservices.com, or by contacting the Company at the address noted above.

2. Basis of presentation

(a) Statement of compliance

These condensed interim consolidated financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting and do not include all of the information required for annual financial statements and should be read in conjunction with the annual consolidated financial statements of the Company as at and for the year ended December 31, 2018.

These condensed interim consolidated financial statements were approved by the Board of Directors on July 31, 2019.

(b) Basis of measurement

The condensed interim consolidated financial statements have been prepared on the historical cost basis.

(c) Functional and presentation currency

These condensed interim consolidated financial statements are presented in Canadian dollars. Each of the Company’s subsidiaries are measured using the functional currency of that subsidiary, which is the currency of the primary economic environment in which that subsidiary operates. All financial information presented in Canadian dollars has been rounded to the nearest thousand except where otherwise noted.

(d) Use of estimates and judgments

The preparation of the condensed interim consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amount of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing these condensed interim consolidated financial statements, the significant judgments made by management in applying the Company’s accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial statements as at and for the year ended December 31, 2018 other than as described below.

Property, plant and equipment

Effective April 1, 2019 the Company changed the method for depreciating its drilling and well servicing rigs from unit of production to straight line and changed certain estimates relating to useful lives and salvage values. The change in depreciation methodology reflects the current and future economic environment within the industry and the Company believes that straight line depreciation better reflects the pattern in which the assets’ future economic benefits will be consumed by the Company, primarily as a result of idle or underutilized assets being depreciated more quickly in periods of low activity. These adjustments were applied prospectively and caused an increase in

CWC ENERGY SERVICES CORP.

depreciation for Q2 2019 of \$697. The following is a summary of depreciation estimates for the Company's property and equipment as of April 1, 2019.

Assets	Method	Rate
Drilling rigs and related equipment	Straight-line with residual values of up to-10%	25 years
Buildings	Straight-line with residual values of up to-20%	25 years
Production equipment – service rigs	Straight-line with residual values of up to-10%	25 years
Production equipment - swabbing rigs and Service Rig Level IV recertifications	Unit of production	24,000 operating hours
Production equipment – coil	Straight-line with residual values of up to-20%	10 years
Support equipment	Straight-line with residual values of up to-15%	2 to 10 years
Miscellaneous equipment	Straight-line with no residual value	3 to 5 years

3. Significant accounting policies

The accounting policies applied by the Company in these condensed interim consolidated financial statements are the same as those applied by the Company in its consolidated financial statements as at and for the year ended December 31, 2018, except for the adoption of IFRS 16 – Leases and Foreign Currency Translation. These unaudited condensed interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto as at and for the year ended December 31, 2018 as filed on SEDAR.

(a) IFRS 16 - Leases

In January 2016, the IASB issued IFRS 16 Leases ("IFRS 16"), which replaces the existing IFRS guidance on leases: IAS 17 Leases ("IAS 17"). Under IAS 17, lessees were required to determine if the lease is a finance or operating lease, based on specified criteria of whether the lease transferred significantly all the risks and rewards associated with ownership of the underlying asset. Finance leases are recognized on the balance sheet while operating leases are recognized in the Consolidated Statements of Income when the expense is incurred. IFRS 16 introduced a single lease accounting model for lessees which require a Right-of-Use ("ROU") asset and lease liability to be recognized on the balance sheet for contracts that are, or contain, a lease. The Company's leases under IFRS 16 primarily consist of vehicle leases, which were previously classified as finance leases, and office leases, which were previously classified as operating leases.

The Company has adopted IFRS 16 on January 1, 2019 using the modified retrospective approach. The modified retrospective approach does not require restatement of prior period financial information as it recognizes the cumulative effect as an adjustment to opening retained earnings and applies the standard prospectively. Accordingly, comparative information in the Company's financial statements are not restated.

For leases that were previously classified as finance leases under IAS 17, the carrying amount of the ROU asset and lease liability remain unchanged upon transition and were determined at the carrying amount immediately before the adoption date.

For leases that were previously classified as operating leases under IAS 17, lease liabilities were measured at the present value of the remaining lease payments discounted using the Company's incremental borrowing rate on January 1, 2019. ROU assets were measured at an amount equal to the lease liability. The recognition of the present value of minimum lease payments resulted in additional \$645 of ROU assets and associated lease liabilities.

CWC ENERGY SERVICES CORP.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the three and six months ended June 30, 2019 and 2018

(Unaudited)

Stated in thousands of Canadian dollars except share and per share amounts

The adoption of IFRS 16 included the following elections:

- Elected to not recognize ROU assets and liabilities for leases term of less than 12 months, or for leases of low value.
- Elected to exclude initial direct costs from measuring the ROU asset at the date of initial application.
- Elected to apply a single discount rate to portfolio of leases with similar characteristics.
- Elected to use hindsight in determining lease term.

As a result of this adoption, the Company has revised the description of its accounting policy for leases as follows:

Leases

A contract is, or contains, a lease if the contract conveys the right of control the use of an identified asset for a period of time in exchange for considerations. A lease obligation is recognized at the commencement of the lease term at the present value of the lease payments that are not paid at that date. Interest expense is recognized on the lease obligations using the effective interest rate method and payments are applied against the lease obligation. At the commencement date, a corresponding ROU is recognized at the amount of the lease obligation, adjusted for lease incentives received and initial direct costs. Depreciation is recognized on the ROU asset over the lease term.

The preparation of the condensed interim consolidated financial statements in accordance with IFRS requires management to make judgements, estimates, and key assumptions that affect the reported amount of asset, liabilities, income, and expense. Actual results could differ significantly from these estimates. Key areas where management has made judgements, estimates, and assumptions related to the adoption of IFRS 16 include:

- **Incremental borrowing rate:** The incremental borrowing rates are based on judgements including economic environment, term, currency, and the underlying risk inherent to the asset. The carrying balance of the ROU asset, lease obligations, and the resulting interest and depletion and depreciation expense, may differ due to changes in the market conditions and lease term.
- **Lease term:** Lease terms are based on assumptions regarding extension terms that allow for operational flexibility and future market conditions.

(b) Foreign Currency Translation

Functional currency is the currency of the primary economic environment in which the Company and its subsidiaries operate and is normally the currency in which the entity primarily generates and expends cash. The financial statements of the Company's subsidiaries are translated into Canadian dollars, which is the presentation currency of the Company. The assets and liabilities of subsidiaries whose functional currencies are other than Canadian dollars are translated into Canadian dollars at the foreign exchange rate at the balance sheet date, while revenues and expenses of such subsidiaries are translated using average monthly foreign exchange rates, which approximate the foreign exchange rates on the dates of the transactions. Foreign exchange differences arising on translation are included in Other Comprehensive Income ("OCI").

The Company's transactions in foreign currencies are translated to the appropriate functional currency at the foreign exchange rate on the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated to the functional currency at the foreign exchange rate at the balance sheet date and differences arising on translation are recognized in net earnings. Non-monetary assets that are measured in terms of historical cost in foreign currency are translated using the exchange rate at the dates of the transactions.

4. Seasonality and Weather

The Company's Canadian operations are dependent on weather conditions which impact our ability to move heavy equipment safely and efficiently in Western Canada's oil and natural gas fields. Activity levels during the first quarter

CWC ENERGY SERVICES CORP.

(Unaudited)

Stated in thousands of Canadian dollars except share and per share amounts

are typically the most robust as the frost creates a stable ground mass that allows for easy access to well sites and easier drilling and service rig movement. The second quarter is traditionally the slowest due to road bans during spring break-up. When winter frost leaves the ground, it renders many secondary roads incapable of supporting the weight of heavy equipment until they have thoroughly dried out. Road bans during this time restrict service and support equipment access to well sites. The third quarter has more activity as the summer months are typically drier than the second quarter. The fourth quarter is again quite active as winter temperatures freeze the ground once more maximizing site access. However, there may be temporary halts to operations in extreme cold weather when the temperature falls below -35C.

5. Property, plant and equipment

	Contract drilling equipment	Production services property, plant and equipment	Other equipment	Total

6. Loans and borrowings

The following table provides information with respect to amounts included in the consolidated statement of financial position related to loans and borrowings:

	June 30, 2019	December 31, 2018
Current liabilities:		
Current portion of Lease liabilities	\$ 775	\$ 346
Current portion of Mortgage Loan	582	582
	<u>\$ 1,357</u>	<u>\$ 928</u>
Non-current liabilities:		
Bank Loan	\$ 23,604	\$ 32,087
Mortgage Loan	11,636	11,927
Lease liabilities	284	381
Financing fees	(263)	(427)
	<u>\$ 35,261</u>	<u>\$ 43,968</u>
Total loans and borrowings	<u>\$ 36,618</u>	<u>\$ 44,896</u>

The Company has credit facilities with a syndicate of four Canadian financial institutions (the "Credit Facility"). The Credit Facility provides the Company with a \$75 million extendible revolving term facility (the "Bank Loan") and other credit instruments. Of the Bank Loan, \$65 million is a syndicated facility with the remaining \$10 million being an operating facility. On August 4, 2017, the Bank Loan was extended for a committed term until July 31, 2020 ("Maturity Date"). No principal payments are required under the Bank Loan until the Maturity Date, at which time any amounts outstanding are due and payable. The Company may, on an annual basis, request the Maturity Date be extended for a period not to exceed three years from the date of the request. If a request for an extension is not approved by the banking syndicate, the Maturity Date will remain unchanged.

The Bank Loan bears interest based on a sliding scale pricing grid tied to the Company's trailing Consolidated Debt⁽²⁾ to Consolidated Adjusted EBITDA⁽¹⁾ ratio from a minimum of the bank's prime rate plus 0.75% to a maximum of the bank's prime rate plus 3.75% or from a minimum of the bankers acceptances rate plus a stamping fee of 1.75% to a maximum of the bankers acceptances rate plus a stamping fee of 4.75%. Standby fees under the Bank Loan range between 0.39% and 1.07%. Interest and fees under the Bank Loan are payable monthly. The Company has the option to borrow funds denominated in either Canadian or United States dollars under the Credit Facility. Borrowings under the Bank Loan are limited to an aggregate of 75% of accounts receivable outstanding less than 90 days plus 60% of the net book value of property and equipment less certain priority payables. As at June 30, 2019, of the \$75,000 Bank Loan facility, \$51,396 was available for immediate borrowing and \$23,604 was outstanding (December 31, 2018: \$32,087). The Bank Loan has an accordion feature which provides the Company with an ability to increase the maximum borrowings up to \$125,000, subject to the approval of the lenders. The Bank Loan is secured by a security agreement covering all of the assets of the Company and a first charge Security Interest covering all assets of the Company (other than real estate assets related to the Mortgage Loan). Effective December 31, 2018, the applicable rates under the Bank Loan are: bank prime rate plus 1.00%, banker's acceptances rate plus a stamping fee of 2.00%, and standby fee rate of 0.45%.

CWC ENERGY SERVICES CORP.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the three and six months ended June 30, 2019 and 2018

(Unaudited)

Stated in thousands of Canadian dollars except share and per share amounts

Under the terms of the Credit Facility, the Company is required to comply with the following financial covenants:

	Covenant limits	June 30, 2019
Consolidated Debt ⁽²⁾ to Consolidated Adjusted EBITDA ⁽¹⁾	4.00:1.00 or less	1.44:1.00
Consolidated Debt ⁽²⁾ to Capitalization ⁽³⁾	0.50:1.00 or less	0.19:1.00
Consolidated Adjusted Cash Flow ⁽⁴⁾ to Consolidated Finance Obligations ⁽⁵⁾	1.15:1.00 or more	4.47:1.00

(1) Consolidated Adjusted EBITDA is calculated as net income plus finance costs, plus current and deferred income taxes, plus depreciation, plus stock based compensation, plus any non-recurring losses or impairment losses, or permitted severance costs, minus any non-recurring gain, plus any expenses related to corporate or business acquisitions with all amounts being for the twelve month period ended the calculation date. Consolidated Adjusted EBITDA is adjusted to reflect the inclusion of material acquisitions or material dispositions on a pro forma basis for the twelve month period ended the calculation date. Consolidated Adjusted EBITDA is increased if debt repayments from the proceeds of equity issuance are used to repay the syndicated facility and designated by the Company as an Equity Cure amount.

(2) Consolidated Debt is calculated as total loans and borrowings as shown in the schedule above adjusted to exclude the funds held in the segregated account and to remove any financing fees included.

(3) Capitalization is calculated as Consolidated Debt plus Shareholders' Equity as at the calculation date.

(4) Consolidated Adjusted Cash Flow is calculated as Consolidated Adjusted EBITDA minus amounts paid for transaction costs, dividends or share repurchases in the twelve month period ended the calculation date. The Calculation of Adjusted Cash Flow excludes Consolidated Adjusted EBITDA resulting from an Equity Cure.

(5) Consolidated Finance Obligations is calculated as finance costs plus scheduled principal payments on debt including scheduled principal payments under finance leases minus accretion of finance fees included in finance costs for the twelve month period ended the calculation date.

Mortgage Loan is a loan maturing on June 28, 2023 that is amortized over 22 years with blended monthly principal and interest payments of \$86. At maturity, approximately \$9,891 of principal will become payable assuming only regular monthly payments are made. On July 27, 2018 the Company entered into an interest rate swap to exchange the floating rate interest payments for fixed rate interest payments, which fix the Bankers Acceptance-Canadian Dollar Offered Rate components of its interest payment on the outstanding term debt. Under the interest rate swap agreement, the Company pays a fixed rate of 2.65% per annum plus the applicable credit spread of 1.35%, for an effective fixed rate of 4.0%. The fair value of the interest rate swap arrangement is the difference between the forward interest rates and the discounted contract rate. As of June 30, 2019 the mark-to-market value of the interest rate swap of \$428 is included within accounts payable and accrued liabilities on the Consolidated Statements of Financial position (December 31, 2018: \$206). For the three months ended June 30, 2019 the mark-to-market value of the interest rate swap resulted in a loss of \$51 included within finance costs on the Consolidated Statements of Comprehensive Loss.

Lease liabilities consist of automobiles and office space which mature in 1 to 3 years. The incremental borrowing rate applied to the individual leases liabilities vary from 4.0-6.4% per annum. During the quarter interest expense on leased liabilities was \$16 and expenses relating to short-term leases was \$nil.

Financing fees consist of commitment fees and legal expenses relating to the Credit Facility and are being amortized using the effective interest rate method over the term of the Credit Facility. For the three months ended of June 30, 2019 financing fees of \$146 and for the six months ended June 30, 2019 \$187 were amortized and included in finance costs (year ended December 31, 2018: \$162).

7. Share capital

Stated in thousands of Canadian dollars except share and per share amounts

(b) Normal course issuer bid

On April 10, 2018, the Company initiated a Normal Course Issuer Bid ("NCIB") which expired on April 9, 2019. Under this expired NCIB the Company was entitled to purchase, from time to time up to 26,057,889 of issued and outstanding common shares through the facilities of the TSXV or other recognized marketplaces. In addition, CWC entered into an automatic securities purchase plan (the "ASPP") (as defined under applicable securities laws) with Raymond James Ltd. ("Raymond James") for the purpose of making purchases under the ASPP. Such purchases were determined by Raymond James in its sole discretion, without consultation with CWC having regard to the price limitation and aggregate purchase limitation and other terms of the ASPP and the rules of the TSXV. Conducting the NCIB as an ASPP allows common shares to be purchased at times when CWC would otherwise be prohibited from doing so pursuant to securities laws and its internal trading policies.

On April 15, 2019, the Company replaced its expired NCIB with a new NCIB which now expires on April 14, 2020. Under the new NCIB the Company may purchase, from time to time as it considers advisable, up to 25,535,115 of issued and outstanding common shares through the facilities of the TSXV or other recognized marketplaces. In addition, CWC renewed its ASPP with Raymond James for the purpose of making purchases under the ASPP.

For the three months ended June 30, 2019, 623,000 shares (2018: 1,023,000) for consideration of \$111 including commissions (2018: \$195) were purchased under the NCIB, and for the six months ended June 30, 2019, 2,673,500 shares (2018: 2,417,500) for consideration of \$482 including commissions (2018: 484) were purchased under the NCIB. In the three months ended June 30, 2019, a total of 744,000 shares were cancelled and returned to treasury (2018: 935,500), and in the six months ended June 30, 2019, a total of 2,536,000 shares were cancelled and returned to treasury (2018: 2,254,000).

(c) Stock options

The following table summarizes changes in the number of stock options outstanding:

	Number of options	Weighted average exercise price
Balance at December 31, 2018	24,351,333	0.25
Expired	(1,700,000)	1.04
Forfeited	(423,000)	0.19
Balance at June 30, 2019	22,228,333	0.19

For the three months ended June 30, 2019, stock-based compensation expense relating to stock options totaled \$109 (three months ended June 30, 2018: \$162). For the six months ended June 30, 2019, stock-based compensation expense relating to stock options totaled \$252 (six months ended June 30, 2018: \$352).

(d) Restricted share unit plan

The following table summarizes changes in the number of Restricted Share Units ("RSUs") outstanding:

Issue date fair value	Number of RSUs outstanding	Weighted average remaining life (years) contractual	Weighted average exercise price (\$)	Number of RSUs exercisable
\$0.14 - \$0.23	5,551,001	2.54	n/a	707,997

CWC ENERGY SERVICES CORP.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the three and six months ended June 30, 2019 and 2018

(Unaudited)

Stated in thousands of Canadian dollars except share and per share amounts

For the three months ended June 30, 2019, stock-based compensation expense relating to RSUs totaled \$88 (2018: \$95). For the six months ended June 30, 2019, stock-based compensation expense relating to RSUs totaled \$174 (2018: \$170).

For the six months ended June 30, 2019, 377,000 RSUs were exercised (2018: 305,667), 36,000 RSUs were forfeited (2018: 227,000) and 54,000 RSUs were issued (2018: 54,000).

(e) Weighted average common shares outstanding

The following table reconciles the common shares used in computing per share amounts for the periods noted:

	For the three months ended		For the six months ended	
	June 30,		June 30,	
	2019	2018	2019	2018
Weighted average common shares outstanding - basic	510,978,053	521,289,658	511,823,718	521,682,326
Effect of dilutive share-based compensation plans	-	-	-	-
Weighted average common shares outstanding - basic and diluted	510,978,053	521,289,658	511,823,718	521,682,326

Outstanding stock options and RSUs are currently the only instruments which could potentially dilute earnings per share.

8. Supplemental cash flow information

	For the three months ended		For the six months ended	
	June 30,		June 30,	
	2019	2018	2019	2018
Increase (decrease) in non-cash working capital items:				
Accounts receivable	\$ 9,036	\$ 20,186	\$ 7,878	\$ 11,290
Prepaid expenses and deposits	(349)	84	84	67
Accounts payable and accrued liabilities	496	173	(25)	873
	\$ 9,183	\$ 20,443	\$ 7,937	\$ 12,230

9. Operating segments

The Company operates its Contract Drilling segment in both Canada and the United States while its Production Services segment operates in Canada. The Contract Drilling segment provides drilling rigs and related ancillary equipment to oil and gas exploration and production companies. The Production Services segment provides well services to oil and gas exploration and production companies through the use of service rigs, swabbing rigs and coil tubing units.

Management uses net income before depreciation and income taxes ("segment profit") in management reports reviewed by key management personnel and the board of directors to measure performance at a segment basis. Segment profit is used to measure performance as management believes this is the most relevant measure in evaluating the results of our segments relative to each other and other entities that operate within the respective industries.

The Corporate segment captures general and administrative expenses associated with supporting each of the reporting segments operations, plus costs associated with being a public company. Also included in the Corporate segment is
